Innovageous
Technology Infrastructure

At Innovageous we specialize in partnering with organizations to ensure facilities are tech smart and have an efficient technology infrastructure that supports high quality teaching, learning and working environments. We also work with leaders to ensure their organization has safe, sustainable and transferable standards of operating practices.

Our technology division includes a team of certified technicians with over 20 years of experience in network hardware, software installation and support. As a team we have partnered with leaders by providing thought partnership, supportive collaborative design, project and change management, capacity building and training to reimagine their technical infrastructure and systems. With our team's leadership experience and the technical expertise of our technicians, the Innovageous team would be strong candidates to support your tech needs.

Ways Innovageous can support your school or organization's Technology Infrastructure

- Technology infrastructure audits

- Infrastructure upgrades (servers, wifi, content filtering, phone system, cabling, etc.)

- Platform migrations (Google Workplace, Office 365)

- Collaborative thought-partnership

- Training and Professional Development

- Tech sustainability design and change management

What our clients are saying 66 99

The Innovageous team successfully tackled some extremely challenging technology issues that we were faced with here at NYLC. They secured our site, backed up our files, and ensured we have the support we need moving forward. Thank you for being consistently professional and extremely responsive.

Amy Meuers, NYLC CEO
